CAREER OBJECTIVE

Motivated B.Sc Computer Science graduate (Savitribai Phule Pune University) with hands-on experience in frontend web development (HTML, CSS, PHP), Java programming, and data analysis using Python, SQL, Power BI, and Tableau. Currently pursuing a certification course in Data Analytics with Generative AI and gaining practical industry exposure through an ongoing Frontend Developer internship. AWS Cloud Computing certified with a strong foundation in software engineering principles. Seeking an entry-level opportunity to apply technical skills, contribute meaningfully to real-world projects, and grow within a forward-thinking organisation.

INTERNSHIP EXPERIENCE

Frontend Developer Intern — Jayvik Labs (Remote)

May 2026 – Aug 2026 (Ongoing) | Internship Code: JVL-FD-2026-004 | 10 hrs/week

- Working as a Frontend Developer Intern at Jayvik Labs, a technology startup building web platforms, AI tools, and SaaS products.
- Assigned a major frontend development project; successfully completed 2 project tasks to date, with the remaining project work in progress.
- Developing responsive, user-friendly web interfaces using HTML, CSS, and JavaScript.
- Gaining practical exposure to API integration, UI/UX improvement, and writing clean, well-documented code.

EDUCATION

Degree / Board	Institution / University	Year	Result
B.Sc. Computer Science (Completed)	Savitribai Phule Pune University	2023 – 2026	FY: 8.46 SY: 7.63 TY: 7.91
HSC (12th Grade)	Maharashtra State Board, Pune	2023	—
SSC (10th Grade)	Maharashtra State Board, Pune	2021	—

CERTIFICATIONS & ACHIEVEMENTS

Data Analytics with Generative AI — In Progress

Currently pursuing certification covering Excel, SQL, Power BI, Tableau, Python (NumPy, Pandas, Matplotlib, Seaborn), Statistics, and Generative AI tools for data analytics.

AWS Cloud Computing – Certified (Basic)

Issued by: Amazon Web Services — Cloud infrastructure, EC2, S3, IAM fundamentals

Marketing Certificate

Issued by: Government of India — Certified marketing programme accredited by the Government of India

PROJECTS

AI Background Remover

Personal Project | Technologies: Python, Streamlit, rembg (Deep Learning), PIL

- Built an AI-powered web application that automatically removes image backgrounds using a pre-trained deep learning model (U²-Net).
- Developed an interactive front-end using Streamlit for image upload, real-time preview, and download of processed images.
- Applied core data science skills including image data handling and model integration into a usable end-to-end application.

Personal Portfolio Website — Internship Task (Jayvik Labs)

Internship Project | Technologies: HTML5, CSS3, JavaScript

- Built a fully responsive personal portfolio website with Home, About, Skills, Projects, and Contact sections.
- Implemented a dark/light mode toggle using JavaScript for dynamic theme switching.

- Designed a mobile-friendly layout using CSS Flexbox, Grid, and media queries for cross-device compatibility.
- Styled the interface with smooth transitions, custom fonts, and a consistent colour palette.

Online Voting System for College

Third Year Project | Technologies: PHP, HTML, CSS

- Designed and developed a secure web-based voting platform for college elections.
- Built dynamic front-end interfaces using HTML and CSS for an intuitive user experience.
- Implemented server-side logic with PHP to handle voter authentication and real-time vote tallying.
- Ensured data integrity through session management and input validation techniques.
- Deployed on a local server environment with MySQL database integration.

Student Performance Analysis using Python

Academic Project | Technologies: Python, Pandas, Matplotlib, NumPy

- Analysed student marks data using Pandas for cleaning and statistical processing.
- Visualised performance trends and insights using Matplotlib charts.
- Performed descriptive analysis to identify high-performing and at-risk students.
- Used CSV files as primary data sources for the pipeline.

Arduino Radar System

Second Year Project | Technologies: Arduino UNO, Ultrasonic Sensor (HC-SR04), Servo Motor, Embedded C

- Built a radar system for detecting nearby objects using an ultrasonic sensor on a servo motor.
- Implemented 15°-165° angle-based scanning to detect objects within a 2-40 cm range.
- Calculated object distance using the time-of-flight principle and displayed data via serial communication.

TECHNICAL SKILLS

Category	Skills
Programming Languages	Java, Python
Web Technologies	HTML, CSS, PHP
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, Statistics
BI & Visualization	Power BI, Tableau, MS Excel (Advanced Dashboards)
Machine Learning & Gen AI	ML Fundamentals (in progress), PandasAI, SQLBuilder, Generative AI tools
Database	SQL (Fundamentals to Advanced)
Cloud	AWS (Certified – Basic)
Tools & IDEs	VS Code, MS Excel, Streamlit
Operating System	Windows

CORE COMPETENCIES

Problem Solving • Quick Learner • Team Player • Adaptability • Communication

LANGUAGES KNOWN

English | Hindi | Marathi

DECLARATION

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.
